MODULE / 05 · PROGRAMME

AI, data analytics and HR technology

From scattered data to evidence-informed decisions

Data quality and modelling; KPIs, PivotTable and Power Query; relational model and Power BI dashboard; Claude/ChatGPT analysis and automation with controls, human approval and error handling.

What you will be able to do

- Organize HR data into a structure that can be used for analysis.
- Build indicators and periodic reports for managers.
- Configure an AI assistant for your work and define the limits of its use.

Who this module is for

HR professionals, department heads and business administrators who prepare workforce reports and want to use analytical tools and AI in their daily work.

How we will work

Case-based work and templates adapted to organizational needs. Synthetic-data project: Excel model, four-page Power BI report and CEO briefing. Includes numerical verification, analytical limitations and data protection.

Module lead: Led Dashi
